

LIST OF CERTIFIED GSI SOIL REPORTS

This is a list of soil laboratory test reports that have been evaluated by PWD and deemed acceptable for approval if sent as a construction submittal for Stormwater Soil or Planting Soil materials on Green Stormwater Infrastructure (GSI) projects. The *Date of Report Expiration* is assigned by PWD. It is a timestamp of exactly 6 months after the printed report date. Soils must be delivered to a project site by the *Date of Report Expiration*. Reports are listed chronologically. This list is updated regularly by PWD when new laboratory test reports are reviewed.

Last Updated:
