

Backflow Prevention Equipment:

- 1) The use of an approved backflow prevention device when accessing a hydrant is always required. If you are found out of compliance, your permit can be revoked without refund.
- 2) A link to a list of approved backflow prevention devices below:
 - a. [Philadelphia Cross-Connection & Backflow Compliance](#)
- 3) Backflow prevention devices can be procured at various locations including but not limited to grainger.com and local plumbing supply stores.
- 4) Once the backflow equipment is procured, take a timestamped digital photograph of the equipment and submit the photo with the hydrant permit application.
 - a. No permit will be approved without proof that the permittee has acquired the proper backflow prevention equipment.
- 5) Example of approved backflow prevention equipment:
