

IN-PERSON Community Meeting

JUNE

25

7:00 PM

Overview

South St. Water Main Replacements

(Project #20661) will replace water mains in the Queen Village neighborhood, starting in Fall 2026.

Join Philadelphia Water Department (PWD) at Queen Village Neighbors Association's community meeting to learn about impacts on neighbors and other projects coming to the area.

Why are we doing these projects?

- PWD replaces aging infrastructure, like water mains and sewers, to improve water service reliability for residents.
- Green stormwater infrastructure (GSI) is also installed to mimic the natural environment to collect stormwater during rain events.

Meeting Location:

Old Pine Community Center
401 Lombard Street
Philadelphia, PA 19147

Representatives from the project construction team will be present to address questions.

Meeting Hosted By:

Queen Village Neighbors
Association

*This is a rain-or-shine event.
This meeting site is ADA accessible.*
