

# Stakeholder Advisory Group

Water Revitalization Plan

## Philadelphia's drinking water future needs your voice.

Philadelphians like you can make an extraordinary impact on our city's future.

In the Philadelphia Water Department (PWD) Stakeholder Advisory Group, community members advocate for a cleaner future and modernized drinking water infrastructure for the city. The Water Revitalization Plan (WRP) is built on PWD's community partnerships and is only possible with the support of local businesses, government leaders, and residents – including you.

Though we've already accomplished so much, there are still dozens of major water facilities to upgrade in the coming years. That's where you come in as part of this group's next cohort of members. In this role, you can be an advocate for your city, community, and home.

*Ready to speak up for Philadelphia's water future?*

## Make a difference as a member

Stakeholder Advisory Group members are vital to the WRP's communication strategy. Members provide their time, expertise, and influence for construction projects in their community and are compensated for their participation. Your key responsibilities as a member of the Stakeholder Advisory Group will include:

**Advocating for the WRP  
in your community**

**Participating in  
quarterly meetings**

**Reviewing and sharing  
WRP progress with  
your neighbors**

**Gathering input from  
your community**

## Member term expectations and limits

To promote equal representation and new leadership across WRP projects, selected group members and alternates are asked to commit to a two-year term from July 2025 to June 2027. For this term, we are especially seeking members **who live or work in the Somerton or Brewerytown neighborhoods.**

Discover how the WRP supports our city and communities at [water.phila.gov/revitalization](https://water.phila.gov/revitalization).

**Join the group today.**
